

## Combined Arms Military Operations in Urban Terrain Training Facility

### DESCRIPTION

The Combined Arms Military Operations in Urban Terrain (CAMOUT) Training Facility is a 900 acre training complex at Marine Corps Air Ground Combat Center Twentynine Palms, CA. It incorporates 1500 structures and sub-terrain features emplaced in geo-typical districts replicating the complexity of a city. Structures within each district are of multi-story and multi-configuration designs appropriate to the represented district and built of conventional construction, fabricated shipping containers and pre-fabricated modular buildings. Data and communication infrastructures and instrumentation of the Range Modernization and Transformation and Combined Arms Command and Control Trainer Upgrade System programs are leveraged to provide Joint National Training Capability for Training Transformation.

### OPERATIONAL IMPACT

The CAMOUT provides maneuver, live-fire, and non-live fire training space for MAGTF Marine Expeditionary Brigade and below echelons in urban operations.

### PROGRAM STATUS

In FY 2006 and FY 2007, Military Construction and Procurement contracts were awarded to perform preliminary design, construction and installation of the Primary Town district and Indirect Fires components.

#### Procurement Profile:

FY 2007-09 efforts will continue to build out the full CAMOUT requirement to 1500 urban structures.

#### Developer/Manufacturer:

Allied Container Systems, Onyx Group, Soltek Pacific, others pending procurement awards
